KNITTED & POLAR FLUOR

IDEAL FOR

- · Workers who require a good thermal insulation to perform static or low intensity work activities in cold environments (specially outdoor).
- \cdot The excellent thermal insulation from PrimaLoft® fabric, helps to keep the worker's body temperature.
- \cdot Includes two retro-reflective stripes.
- \cdot Cold coverage with innovative style and knitted looks.

! ≤ Rct < 0,18	2	2	5 < AP ≤ 100
≤ Rct < 0,25	3	3	AP ≤ 5
1.25 < Ret	4		

This garment is specially designed and indicated to protect its wearer against the cold in environments that are not excessively cold and that are characterised by a possible combination of damp and wind at temperatures of -5° C or more.

PROTECTIVE PROPERTIES AGAINST MINIMAL RISKS DUE TO LOW VISIBILITY. This garment alone does not protect against this risk, as it does not reach a minimum surface for the user to be seen, but it helps increase visibility as long as the user also wears suitable protective clothing against this risk.

KEY FEATURES

MOISTURE MANAGEMENT

FLEECE

DIMENSIONS

26,5 cm

FABRICS COMPOSITION

- Outter Fabric: 100% Acrylic.
- · Fleece: 100% Recycled Polyester.

PRIMALOFT. BIO^{**}

PrimaLoft® Bio™ brings a new approach to sustainability without compromising its industry-leading performance and comfort throughout the life cycle of the garment. This innovation lies within the makeup of the fibers, which led to the creation of the world's first 100% recycled synthetic insulation and fabric designed to return to nature. A revolutionary breakthrough that offers a previously unattainable level of performance and sustainability, drastically reducing the amount of micro plastics in our landfills and oceans.
